

BoxCollider::touchEachOther

PolygonCollider::touchEach
Other

Collider::getContactPoints

```
graph LR; A[BoxCollider::touchEachOther] --> C[Collider::getContactPoints]; B[PolygonCollider::touchEachOther] --> C;
```

The diagram illustrates a relationship between three methods. On the left, there are two white rectangular boxes. The top box contains the text 'BoxCollider::touchEachOther'. The bottom box contains the text 'PolygonCollider::touchEachOther' on two lines. On the right, there is a gray rectangular box containing the text 'Collider::getContactPoints'. Two blue arrows point from the right side of the left boxes to the left side of the gray box. One arrow originates from the bottom of the top box, and the other originates from the bottom of the bottom box.
